

CTA1200 Constant Current Characteristic

CTA1200
Brake : OPB10N
Setting : 80%→20%

Constant Current Controller : CTA1200 keep the output current setting value (80% and 20%) to adjust the outputvoltage automatically. CTA1200 can keep the toruqe (tension) constant, because the toruqe correlates with the current value. Constant tension is achieved via CTA1200.
